

The North Woods Way-finding Project

Aisha Malik | LAR 244 | Spring 2023

When surveying URI students, faculty, and community members about the North Woods trail, there was an overwhelming response regarding way-finding and trail marking. Many of those who answered the survey mentioned how the trails were poorly marked, which made it difficult to explore and navigate the trails efficiently. With this feedback from the

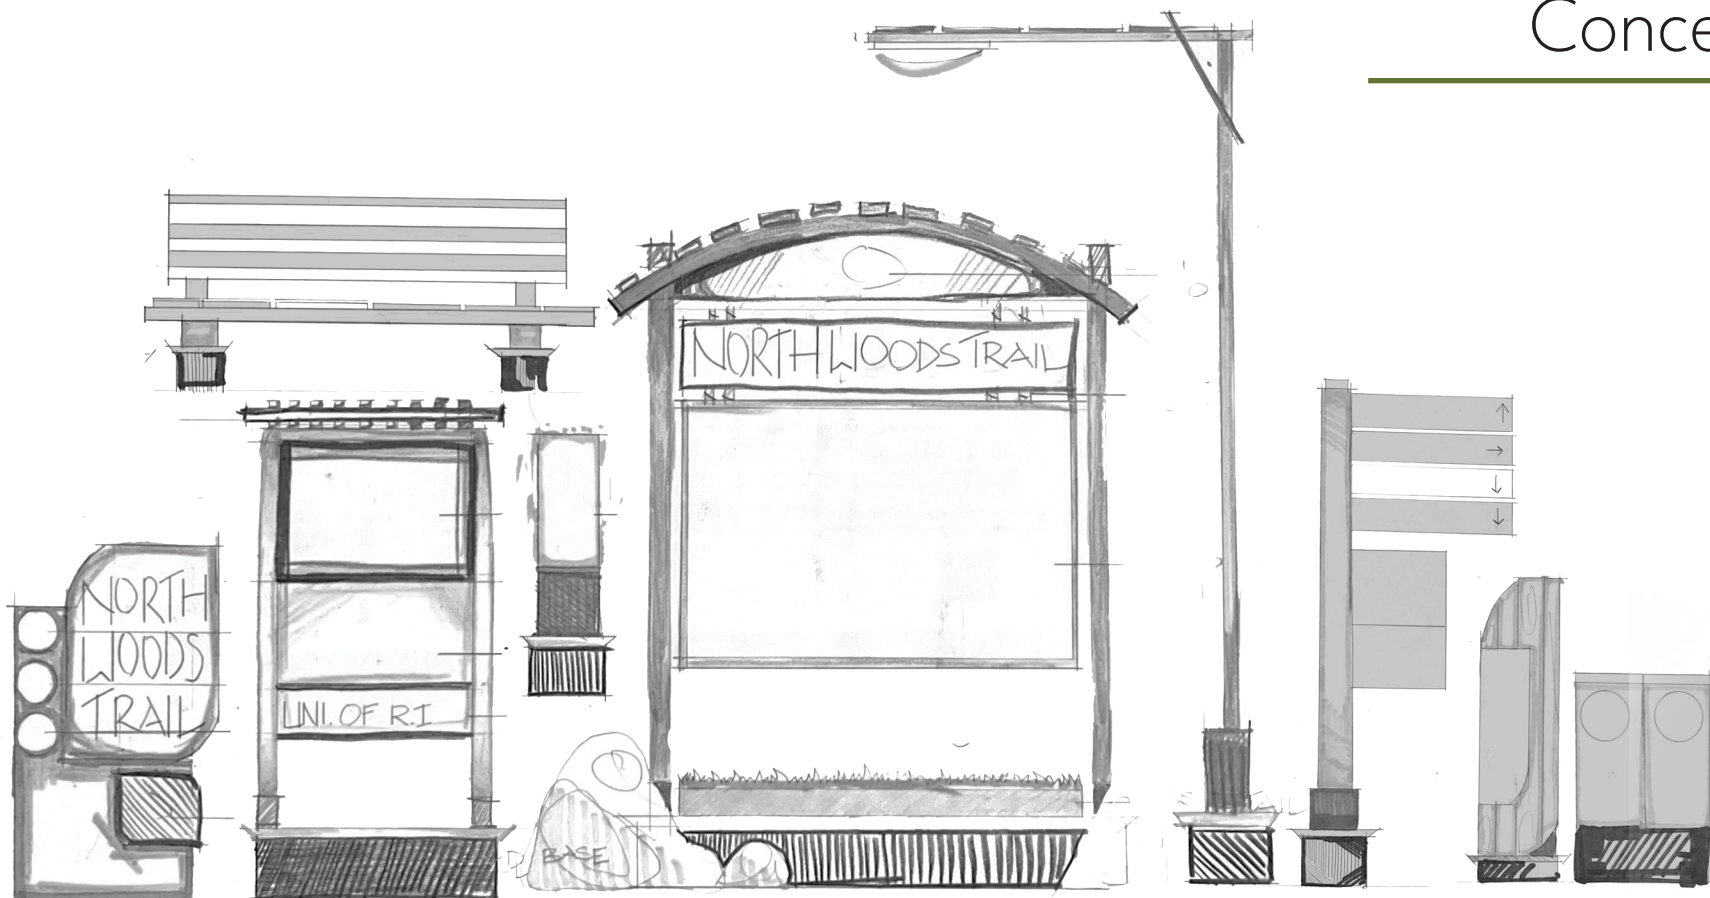

community, I decided to design trail markers and way-finding to help trail-goers maneuver around the North Woods with ease. According to community feedback, there will be maps embedded in the signage, lights, benches, trashcans, and warning signs for wildlife and bugs.

SITE ANALYSIS NORTH WOODS

Site Analysis

Concept Map

- 1- Medium way-finding sign
- 2 - Large welcoming sign, located at all entrances
- 3 - Small wayfinding sign
- 4 - Lightpoles will be placed strategically along the trail
- 5 - Multiple direction way-finding sign with map included
- 6 - Wooden bench strategically placed along trail
- 7 - Tick warning signs
- 8 - Trash and Recycling cans

Top Perspective - Depicts one of the many trail intersections with better trail management, and way-finding signs to help direct trail-goers.

Left Side Perspective - Depicts the Flagg Rd. entrance into the woods, complete with a large welcoming sign and benches.

Final Plan
